

# Contents

	<b>Introduction</b>	<b>9</b>
<b>1</b>	<b>ADME and Pharmacokinetics</b>	<b>10</b>
1.1	ADME – Absorption Distribution, Metabolism and Excretion	10
1.2	Pharmacokinetics	11
<b>2</b>	<b>Absorption: Absorption rate constant, Bioavailability and Salt factor</b>	<b>13</b>
2.1	Passive diffusion and other mechanisms by which drugs may cross biological membranes	13
2.2	Rate of drug absorption and the Absorption rate constant ( $K_a$ ).	17
2.3	Bioavailability	18
2.4	Salt factor	23
<b>3</b>	<b>Distribution: Compartments and Volume of Distribution</b>	<b>24</b>
3.1	The rate of distribution and compartments	24
3.2	One compartment model	25
3.3	Two compartment model	25
3.4	The extent of distribution	27
3.5	Volume of distribution	31
3.6	Using the volume of distribution to calculate dose size	35
3.7	Practice calculations	36

<b>4.</b>	<b>Elimination: Elimination rate constant, half-life and clearance</b>	<b>38</b>
4.1	Elimination rate constant and half-life	38
4.2	Clearance	42
4.3	Practice calculations	46
<b>5</b>	<b>Single intravenous bolus injection into one compartment</b>	<b>47</b>
5.1	Concentration versus time graph	48
5.2	Relationship between time and concentration	49
5.3	Area Under the Curve (AUC)	52
5.4	Practice calculations	54
5.5	Appendix 1	54
5.6	Appendix 2	54
<b>6</b>	<b>Analysis of experimental data from a bolus i.v. injection into one compartment</b>	<b>56</b>
6.1	Analysis of clinical trials data	57
6.2	Analysis of data arising in a clinical setting	61
6.3	Practice calculations	62
6.4	Appendix 1	64
6.5	Appendix 2	66
<b>7</b>	<b>Single intravenous bolus injection into two compartments</b>	<b>67</b>
7.1	The model to be considered	67
7.2	Drug concentrations in blood and the rest of the first compartment	67

---

7.3	Determining how many compartments a drug occupies	69
7.4	Drug concentration in the second compartment	70
7.5	Two compartment systems and therapeutic drug monitoring for digoxin	71
<b>8</b>	<b>Constant intravenous infusion</b>	<b>73</b>
8.1	The model to be considered	73
8.2	Concentration versus time curve during infusion	73
8.3	Relationship between rate of infusion and concentration at steady state	74
8.4	Loading doses	75
8.5	The accumulation period	80
8.6	Practice questions	82
8.7	Appendix	82
<b>9</b>	<b>Extravascular administration</b>	<b>83</b>
9.1	The situation to be considered	83
9.2	Concentration versus time curve	83
9.3	Changing the rate of absorption	85
9.4	C <sub>max</sub> and T <sub>max</sub>	86
9.5	Determination of bioavailability for extravascular doses.	86
9.6	Trapezoidal rule - A practical method to measure AUC	89
9.7	Practice question	92
9.8	Appendix	93

<b>10</b>	<b>Multiple dosing</b>	<b>94</b>
10.1	Pharmacokinetic accumulation and steady state	94
10.2	Multiple extravascular doses	96
10.3	Concentrations at steady state	96
10.4	Loading dose	101
10.5	Accumulation stage	102
10.6	Extent of fluctuation in drug concentrations	103
10.7	Practice questions	107
10.8	Appendix	108
<b>11</b>	<b>Non-linear pharmacokinetics</b>	<b>110</b>
11.1	Considering drug metabolism as an enzyme catalysed reaction	110
11.2	Exceptions to linearity	112
11.3	Effect of non-linearity on the relationship between dose and drug concentration.	113
11.4	Clinical significance of non-linear kinetics	114
11.5	Non-linear kinetics and drug development	115
<b>12</b>	<b>Non-compartmental pharmacokinetics</b>	<b>116</b>
12.1	The case for non-compartmental methods	116
12.2	Calculation methods	116
12.3	More complex situations	118

<b>13</b>	<b>Computerized analysis of pharmacokinetic data</b>	<b>119</b>
13.1	Least squares fitting	119
13.2	Practice question	124
<b>14</b>	<b>Creatinine clearance</b>	<b>125</b>
14.1	Clearance of creatinine and various drugs	125
14.2	Digoxin dosing	127
14.3	Practice questions	129
	<b>Pharmacokinetic symbols and equations</b>	<b>130</b>
	Symbols	130
	Cockcroft and Gault equations	132
	<b>Additional material available from the internet</b>	<b>133</b>
	<b>Answers to practice questions</b>	<b>134</b>
	Chapter 3	134
	Chapter 4	135
	Chapter 5	137
	Chapter 6	138
	Chapter 8	140
	Chapter 9	142
	Chapter 10	143
	Chapter 13	146
	Chapter 14	146
